

Life Insurance

Life Insurance will provide protection against an unexpected tragedy. A policy will cover your personal bills, daily expenses, mortgage, your children's education, debts, and other financial responsibilities. Life Insurance can also be used for tax efficient estate planning and succession planning strategies.

Disability Insurance

A personal disability plan will create a stable source of income if you have an injury/illness; it will ensure your finances are maintained and pay for any expenses related to your disability. If your group plan includes disability, you can purchase an additional personal policy to maintain your standard of living

Critical Illness

A critical illness policy will allow you to take the time you need to recover. A typical policy will pay a lump sum benefit to the policy holder if he or she contracted a serious disease or illness. This type of insurance will maintain your finances and pay for any expenses related to your illness.

Home, Auto & Commercial Insurance

Our clients receive preferred rates for home & auto insurance. If you own a business, we can help you with your commercial insurance needs as well.

Investments & Retirement Planning

Whether you are investing in RRSPs, TFSAs, RESPs, Mutual Funds, or Segregated Funds, we can help you make the most of your money
